The Positive  
Way!**

Have You Heard? There's a New Choice

# Model of Care in Autism

## **We. Are. Different.**

**Purposeful Play:** Our approach helps the parents enter the child's world and meet the child where he/she is with love and helpful guidance.

Play therapies through Positive Development's integrated teams create fun for children and parents, becoming a joyful part of daily life. The children are excited to participate in therapy and welcome being invited into interactions. Parents gain the confidence to listen and enter the child's world by establishing connections and, through those connections, helping the child grow.

## **We. Are. Trusted.**

**Transformative Growth:** We provide a clinical model choice that leverages an evidence-based and proven developmental approach to deliver a higher quality of care more affordably than alternatives.

Developmental disciplines have been around and delivering results for more than 30 years; it's only in the last decade that research has been done to document the dramatic difference these techniques can make.

## **We. Are. Ready.**

**Starting Immediately:** We can provide behavior consultations with a proven developmental framework delivered by an integrated team.

- Mental health professionals
- Occupational therapists
- Speech therapists
- Developmentally trained paraprofessionals

## **Are You Ready?**

We will match you with a Care Coordinator who will reach out to schedule an initial developmental consultation and help you through our intake process.

**"We tried other approaches, but Positive Development was the only one that gave me the skills to connect with my child for the first time."**

**–Positive Development Parent**
