Speech Therapy!

SPEECH THERAPY

We are proud to offer Speech Therapy at our West Long Branch Clinic. This therapy is crucial for many individuals, particularly those in the Autism community. Speech-language pathologists (SLPs) work to prevent, assess, diagnose, and treat speech, language, social communication, cognitive communication, and feeding and swallowing disorders.

FEEDING THERAPY

Feeding issues are common in children of all ages and can be extremely stressful for parents.

At GBS, our highly skilled Speech Language Pathologist and BCBA's use the latest techniques to help your child. Our services are science-based, results-driven, and closely tied to the principles of ABA therapy.
